Food Grade Platforms for the processing & packaging industry.

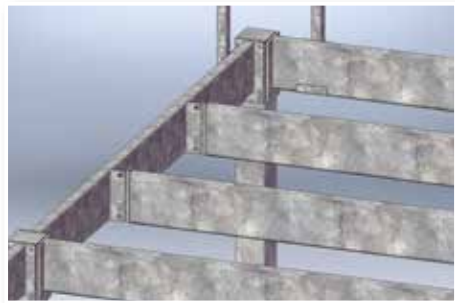

Cubic Designs Food Grade Platforms are ideal for food and beverage processing and packaging facilities that must meet varying Clean Design requirements and Good Manufacturing Practices (GMPs) as necessitated by the USDA and FDA.

Our AIB-audited platforms not only meet these Clean Design requirements, but also incorporate the benefits of our "standard" bolted-design mezzanines and platforms.

- Professionally-engineered for any seismic zone
- Custom fit, shop-quality finish
- Quick, easy installation with little plant disruption
- Consistent lead times

Streamline your facility operations with the help of a Cubic Designs Food Grade Platform.

Conveyor Support & Access ■ Wash Down Areas ■ Operator Stations ■ Work Platforms
Production Equipment Support & Access ■ Crossovers & Catwalks

Connection design minimizes catch points

Fastener connection design minimizes exposed threads

Enclosed square/rectangle tube steel

Design Options.

- Closed shape, square and rectangular tube steel framing and handrail for clean applications
- Open shape, c-channel framing for a more economical option in "dry" areas with less stringent clean requirements
- 304 stainless steel, galvanized steel, or powder coat finished carbon steel
- Bolted connections for quick and easy installations, where acceptable, with fastener and connection design options to minimize catch points and exposed threads
- Welded frame options where required for more stringent clean requirements
- Various deck options: stainless steel, carbon steel, or aluminum plate, concrete, open bar grating (steel or fiberglass)
- Welded frame or bolted handrail options
- Various kick plate options

Superior BENEFITS

As the only AISC certified mezzanine manufacturer, Cubic Designs is the ideal choice for your food and beverage processing and packaging facility platform.

- Accommodate varying degrees of Clean Design requirements
- Closed shapes and clean connection designs minimize catch points
- Variety of design and finish options for a custom fit
- PE-stamped design and drawing, at no extra charge
- Economically-designed to maximize steel efficiency while supporting required loads
- Highest quality manufacturing – AISC and AWS certified

Cubic Designs Food Grade Platforms are designed and manufactured to meet GMP Standards. That means our product meets strict AIB audit requirements for food and beverage processing and packaging.
