

PIPE RACKS

SAFE. STRONG. PROVEN.

Cubic Designs Pipe Racks are pre-engineered, manufactured pipe rack systems designed to support elevated piping, conduits, cable trays, ducting and other overhead facilities support systems. Pipe Racks are ideally suited for manufacturing and processing plants that require large numbers of facility service connections between production and ancillary equipment, especially when quick and clean installation of the support steel is required.

Features/Benefits of Cubic Designs Pipe Racks:

- Professional Engineered/PE-stamped design, at no extra charge
- Economically designed to maximize steel efficiency while also supporting the required loads
- Square tubing is stronger and easier to clean than pipe fitting designs.
- Highest quality manufacturing—AISC certified, AWS certified
- Powder coat finish provides clean appearance that can be color-matched to plant or equipment colors
- Custom finishes allow for our Pipe Racks to be used in both internal and external applications
- Choose from 14 standard colors. Custom colors and paint finishes available upon request. Please note: Custom colors and finishes may affect price and lead time.
- Installation friendly design
- No disruption to production in your facility during installation

the perfect fit

PIPE RACKS

SAFE. STRONG. PROVEN.

Cubic Designs Pipe Racks are professionally engineered and manufactured with heavy-duty square tubing and cold-formed c-channel components. Pipe Racks are custom designed to meet capacities, heights, lengths and other dimensions/specifications as required by your specific applications. Cubic Designs can manufacture these systems very efficiently and economically in our state-of-the-art fabrication plant, away from your facility to minimize onsite disruption and debris, and providing added safety and cost savings to you. Cubic offers a turnkey process – from design and manufacturing to installation, all without any disruption to your day to day processes.

Applications:

- Support mechanical piping systems
- Support electrical power and control lines; conduit racks, cable tray/ladder tray, wire way
- Support ducting
- Support pneumatic material handling systems
- Span piping over rail spurs for offloading material from rail cars and external storage silos

Cubic Designs is the perfect fit for your Pipe Rack project.
