Maximum load capacities for all tray sizes

Modula OneTon provides a maximum tray load capacity of 2,200 lbs (990 kg) per tray for the entire range of models regardless of tray width or depth, without sacrificing user ergonomics or safety. With the availability of the fully automatic external picking bay, the OneTon may easily be used with overhead lifting devices, cranes or hoists.

Modula WMS software suite

Modula WMS is a fully featured warehouse management software that can be used to manage the space and utilization of Modula OneTon units or as a standalone software tool. It can easily be interfaced with nearly any ERP system.

Maximum payload for every tray width

Modula OneTon VLM units offer a wide range of tray dimensions and load capacities. With tray sizes up to 13.3 feet (4.06 meters) wide and load capacities of up to 2,200 lbs, OneTon units are able to meet nearly any application's requirements.

Operator safety

All Modula units are equipped with physical and optical safety barriers in order to ensure a 100% safe environment to operators. Unit safety is further guaranteed by the TÜV-GS certification obtained for the entire product line.

Internal or external bay, single or dual delivery

The internal bay is the ideal solution when space is at a premium.

The external bay offers the best possible ergonomic workspace for operators. It can provide further benefits when used in combination with picking aids such as cranes and mechanical manipulators to lift heavy items stored within trays.

Single delivery level is ideal when the machine will be used moderately, or when the picking time is quick.

Dual delivery is the ideal configuration for a fast-paced picking operation.
